

Energy Contractors

PACE Financing Can Grow Your Business.

- **Offer no money down financing covering 100% of project costs.**
- **Design comprehensive projects that are immediately cash flow positive.**
- **Gain access to more potential customers.**

Energy contractors across Maryland are learning that PACE financing means growing their business. PACE financing covers 100% of project costs up-front – including construction and soft costs – so contractors have access to the capital needed to quickly turn proposals into funded projects.

PACE removes the financial barriers facing energy efficiency and clean energy projects. With no money down, competitive rates and repayment terms of up to 20 years, property owners no longer have to patch up old equipment that is too expensive to replace. Big ticket items, such as new boilers or solar, can be implemented on a positive cash flow basis from year one. With PACE, contractors and their clients can go beyond the low hanging fruit to implement larger, more comprehensive capital projects.

PACE can be used to implement a wide array of energy saving upgrades to existing buildings and can also be used for qualifying energy components of new construction.

Almost any commercial building, including offices, hotels, restaurants, farms, retail, warehouses, factories, and non-profits are eligible for PACE financing.
