Kent County Planning Office

Dear Sirs:

We have been following the possible changes in the zoning codes of Kent County.

We do not want non-ag uses in the agriculture areas- no data buildings & no solar fields.

There should be reasonable setbacks for livestock and manure buildings, but no closer than 200 meters or I think about 600 feet from our property lines.

Kent County is a beautiful farming area – do not increase the residential density possibilities in the agriculture areas.

Although have only owned farmland in Kent County since 1978, our family finds it a very special place.

Best,

W. Meding, President
Schnellenberg Farm Inc.
